Credit vendors in **BOLD** require entry of both website & separate FNMA credentials to successfully reissue and/or run FNMA DO/DU in the system. Mark the FNM checkbox to indicate FNMA credentials.

When setting up credit vendors in the ADMIN area, keep in mind the following:

THIS COMPANY'S CREDIT BUREAU ACCOUNTS

Select the credit vendor here and enter your Account Number and Password in the fields below and click Save Credit (if account number and password fields are not completed the user will be required to enter the credentials when they go to pull initial credit).

NOTE: Credentials MUST be stored in order to pull DU/DO findings.

If your selected credit vendor uses a different Account Number and Password when running Fannie Mae DU/DO, you must add your vendor twice, once with the standard Account Number and Password, and once with the Fannie Mae DU/DO Account Number and Password. Only check the FNM box if the Account Number and Password entered are specific for Fannie Mae DU/DO.

When adding credit vendors from the dropdown, the  is a hover over that provides contact info and/or may also provide hints about the selected vendor's specific format requirements for credentials:

None ▼  **Verify**

Example of info:

Informative Research
800-473-4633
www.informativeresearch.com
Username-Acct No

If the selected credit vendor provides user a set of WEBSITE logins AND a separate set for REISSUE AND/OR FNMA, then the vendor needs to be entered twice, with the FNM checkbox marked for the FNMA set- such as:

SettlementOne (290) ▼	Mary-0x0x0x0	LittleLamb1	<input type="checkbox"/>	 Verify
SettlementOne (290) ▼	75-xoxoxo	Sheep2	<input type="checkbox"/>	 Verify

Keep in mind that if the credentials are stored at the company level, then both sets should be stored there, or if credentials are stored at the user level, then both sets should be stored there. System cannot validate for FNMA DU/DO pulls if the credentials are split between company level and user level. For any given credit vendor that issues two separate sets, both must be stored at the same level.

There are 6 supported credit vendors that allow a hyphen "-" as part of the account # for stored credentials:

<i>FNMA Credit Provider #</i>	<i>Credit Vendor Name</i>
6	Sharper Lending
17	Credit Plus
31	ACRANET [all of the supported ACRANET branches see page 1]
78	MCB – [Augusta]
281	MeridianLink, Inc.
283	Certified Credit Reporting

All other credit supported credit vendors will parse out any hyphens "-" and will try to send three separate data elements for authentication with the vendors in order to re-issue.
